Miss Janet Gregory
34a Barnsdale Road
London W9 3LL, England
Great Britain

Dear Miss Gregory,

I have on my table your suggestive letter, written into a very fine English. Of course, there is a clear, evident connection between religious apparitions and UFO contactees messages. Both are pointed out. The truth concerning the comprehensive universe, the whole cosmic problematic, is an immensely complex matter. On the other hand our planetary variety of ecological media and geographical, racial, historical, cultural differences amongst the warring human groupments is equally profoundly remarkable. Therefore any one intent in order to transmit to human beings the universal truth surely must be of a comparable complexity. I think this is precisely the cause of such a baffling proliferation and variety among the very abundant contact claims. In each one of them the alleged cosmic superior powers (CSP) "lessen" only a part of the truth, and this portion comes carefully adapted to mental & social characteristics of the receiver people. Furthermore, I believe the CSP leak deliberately inside every revealed teaching other elements "outside" the true doctrine itself, in order to create uncertainty, doubt and confusion. The CSP never give us the pure truth, but they throw it at our face mixed with lies, contradictions and ambiguities, for they offer to us the truth (a special, difficult, tangled part of truth), but never the evidence, in order to preserve in every circumstances our capacity of choosing and human free will. For this reason the claims of contactees are often incredible, ridiculous, impossible. Most contactees says the honest truth, but the content of contactees' texts must be meticulously analyzed and sieved for separating the wheat from the weed. No doubt such a filtered, sophisticated contactee's "truth" contains an astonishing amount of real, actual information concerning the nature, structure and laws of the universe. (In accordance with the "accounts" released by the alleged entities from the planet UCCQ, who live in Spain, the number of existent universes and anti-universes is infinite, and on they all died manifests all possibilities). In the future, when ufologists compile the whole information from all contact-claimants who have brought to us messages since the prehistory, we shall surely stagger, for such messages are deeply significative. The messages must be classified under logic headings, by different subjects, after a scrupulous study and screen. The messages probably come from many different classes of CSP, but it is sure that these super-human senters keep each other, in a surprising high degree, some kind of a very controlled and organized interplanetary confederation when they work on Earth business, showing that extraterrestrials take action upon our planet under a firm, coherent central authority who put in order their activities with a showy, notable efficient uniformity, apparently without outerspace rowdy & roughneck. The christian apparitions are only one specific type among the multiple, polyvalent manifestation of contact-affairs, which was designed in order to have an influence on European and Latin American countries since XII century. I think does not exist an actual difference between apparitional and "contact" phenomena. Which of them do you prefer, Miss Gregory? With my best wishes
